REASONS FOR ALLOWANCE

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 2/28/05 has been entered.

2. The following is an examiner's statement of reasons for allowance: The prior art fails to disclose the combination of a mount securable to the base at a first position juxtaposed adjacent the trunnion and a second position wherein the mount extends in a second direction opposite from the base; and a hitch coupled with the mount, including a first ball and second ball which are formed together as a homogenous monolith of a single material which extend in first and second directions. (The specific disclosure of Avery in the IDS filed 2/28/05 has been considered but if a first ball and second ball which are formed together as a homogenous monolith of a single material were to replace the single ball of Avery, this would render the device inoperable, since the second ball would either interfere with the portion, 4, or the side portions, 12 and 13.)

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
